

1. Untighten **toe strap** (by loosening completely the **notch strap** from the **buckle** of the strap) as well as the **heel strap** so as to insert your boots and to adjust the **heel strap of binding** to your boot size. See Fig.2

2. Place the toe of your boot **just exactly over the front part** of the articulated binding, below the curved notch strap and below tightening buckle.

3. Your boot is then well positioned: insert the loosened notch strap (step1) inside the ratchet buckle around your boot; start **tightening the toe strap firmly** by **tightening micrometrically the toe buckle** by moving back and forth the lever of ratchet buckle **until you feel firmly tightened..** Due to the flexible material of the binding front lateral parts your boot perfectly fits the binding laterally

4. Adjust the heel strap to the proper size of your boot using the elasticated rubber heel strap system. See Fig.2:

4a-Move the heel **rubber strap** through the heel size adjust metallic buckle until a hole of the webbing reaches the right size of your boot: the heel of your boot must tightly fit the back of the heel strap for **perfect maintaining of the boot while snowshoeing**

4b-when size is correctly adjusted insert the rubber webbing in the mobile hook, backwards so as to prevent the heel strap to be loose in the snow

5. **Snowshoeing: articulated binding** moves around the rotation axis morphologically along with your foot up and flat on the snowshoe base

6. **After use, untighten heel strap** first: remove heel strap webbing from the hook, get it out from the metallic buckle retainer, loosen the size. Then untighten the toe straps: push on the **release lever** of the ratchet buckle and pull out the binding side from the notch strap while keeping pressure on the **buckle push release lever**. See fig 3a. Remove your boot. **To store** the snowshoe push the articulated binding flat on the base

9. **ALWAYS rinse** snowshoes with water and brush to remove mud and debris after every use.

.MORPHO® snowshoes don't have a right or left snowshoe. MORPHO recommends to wear the snowshoes so that the toe ratchet buckles and heel strap buckles are on the outside of the foot so as to tighten ankle and toe straps in the easiest way.

.Kneeling on one knee and wearing the other foot snowshoe is the best position to be when putting on the snowshoes. This gives you the best grip and leverage for inserting and tightening the straps.

.Heel and toe straps must firmly tightened around your boot

**.Do not snowshoe on rock or concrete**, this causes excess wear: take off snowshoes until you are back on snow.

## CHARACTERISTICS

. Snowshoe with semi-rigid **flexible binding**, 1 ratchet snowboard type buckle toe strap, curved notch strap, micrometric adjustment, and one rubber heel adjustable strap **WITH** pad: outstanding comfort for kids

.Binding set up on base: easy around an axis thanks to stainless steel set of 3 screws, washers and bolts

.Stainless steel 1mm thick front knives

.**TRIMOVE XS**© patented snow Trimaran shape 3D MORPHOLOGIC, Hull shape tip,

.Contact surface: 2 x 607cm<sup>2</sup>, Weight per pair: **1.1Kgs**

.Length: 40cm, max. Width: 18cm, Tip height: 6.4cm

.**Flat backpacking** thanks to flexible binding

### GENERAL:

.Material: polypropylene copolymere base, polyacetal quick lock buckle type toe strap, 4 teeth metallic front knives; perfect grip

.Base structure with vertical stripes 360 providing best grip uphill, downhill and in traverse.

. Accepts all types of boots from size 27 to 40 EU, kid 7 to Men 7 US

. Very easy boot size adjust thanks to heel rubber strap system and snowboard type ratchet buckle toe strap

. Guaranteed **2 years** down to -38°C, shock resistant.
